

1. Sex is the physical & biological characteristics that distinguish males from females. Women & girls' rights should be based on sex, not "gender identity".

2. Maternal rights & services are based on women's unique, sex-based capacity to gestate & give birth to children. These rights & services should stay reserved for persons of the female sex.

3. Women have the right to control their fertility. The reproductive rights of women & girls, & their access to reproductive services, should be upheld.

4. Women have the right to hold opinions without interference. This should include the right to hold & express opinions about "gender identity" without being subject to harassment, prosecution or punishment.

5. Women have a right to peaceful assembly & a freedom of association. This should include the right to assemble & associate based on their sex. Women's assemblies & associations should not have to include men who claim to have female "gender identities".

6. There are opportunities & protections that were specifically created to help women achieve equal status with men. These opportunities & protections should apply only to persons of the female sex & shall not include men who claim to have female "gender identities".

7. Women & girls are objectively physically different from men & boys in ways other than reproductive capacity. For women & girls to have equitable opportunities in sports, certain sports activities must remain single-sex.

8. Single-sex victim support services, including rape crisis centers & domestic violence shelters, should remain single-sex. In order to create effective policies to eliminate sex-based violence, we need accurate data & statistics about who the victims & perpetrators are, including their sex.

9. Children should receive accurate information about human biology & reproduction...not gender stereotyping through their education. Children should not be subjected to the use of drugs & surgery for "gender reassignment".
