

Dear Friends,

Please take 30 minutes to watch our new video on the dangers of gender ideology. This ideology poses a serious threat to children's health, women's rights, gay and lesbian rights, free speech, and rational thought.

Unfortunately, the Eliot community and Unitarian Universalists in general have fully embraced gender ideology. It's even promoted in the children's program. This is rationalized as furthering tolerance and inclusion. But embracing this anti-science, anti-democratic ideology, far from being inclusive, dilutes and negates much of what UUs purport to stand for.

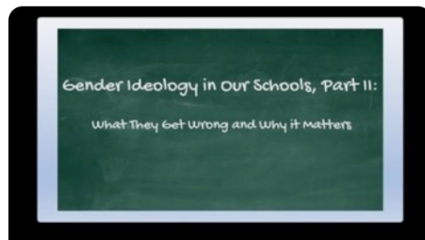

It should go without saying that all people deserve love and compassion. But the rights claimed by one group cannot be justly based upon removing the rights of others.

Please take a moment to acquaint yourself with the facts. This is an important point in history where everyone is being tested. Some will keep silent and allow the abuse to continue; others will stand up and insist that the emperor has no clothes.
